I am a full-stack software developer with a proven track record of delivering innovative solutions for analytics-driven products. With a strong foundation in both front-end and back-end technologies, I excel in developing seamless user experiences and robust architectures. My proactive approach to problem-solving, combined with a passion for continuous learning, enables me to tackle challenging projects effectively. I am eager to bring my technical expertise and dynamic approach to a team that values creativity and forward-thinking.

---

## SKILLS

### Strong

Python, Django, JavaScript, TypeScript, React, JQuery, HTML, CSS, SCSS, Docker, Rest API, WebSocket, Git, Github, Database Management

### Interests

Cryptography, Encryption

## SOFT SKILLS

Problem-solving, Time management and Adaptability, Research, Analytical thinking

## LANGUAGES

Azerbaijan - native  
English - B2  
Turkish - fluent

---

## EDUCATION

### **Bachelor/ Baku Engineering University, Computer Engineering**

2019 - 2023

Acceptance score: 578/700

Grade: 91.47

Full scholarship by government of Azerbaijan

### **Master/ ASOIU, Computer Engineering**

2023 Sep - present

Acceptance score: 77/100

Full scholarship by government of Azerbaijan

---

## EXPERIENCES

### **FullStack Developer/ Simple Co.**

07/2022-present

In my role as a Fullstack Developer, I am responsible for developing both the backend logic and the frontend visuals of projects, while also contributing to DevOps practices to enhance project deployment and operational efficiency.

**The technologies I used** - Python, Django, Pandas, Rest API, Docker, Git, Github, Js, JQuery, Html, Css, React

## **Back-End Developer/ KhanButa Group**

05/2022

During my short stay in Khanbuta, I was able to contribute effectively to several projects. In addition, I learned new skills, Docker is an example of this. npg.az, ipekyolu, etc. I took part in projects.

**The technologies I used** - Python, Django, Rest API, Docker, Git, Github and DigitalOcean.

## **Front-End Mentor/ BOOSTCAMP 4.0 at Baku Engineering University**

02/2021

It was an activity conducted by ICT at Baku Engineering University. It was a month when I shared my **FrontEnd(HTML, CSS, JavaScript)** experiences with students who wanted to start in this field.

## **Front-End Intern/ Gənclərin Karyera və Yüksəliş Mərkəzi**

11/2020 - 02/2021

I participated in a project called "Tehsil-info" as a frontend intern. During the internship, I participated more actively than other interns and graduated with honors.

**The technologies I used** - HTML, CSS, JavaScript, JQuery, Git and Github.

---

## **PROJECTS**

### **Back-end Developer/ TP Logistics**

I created Rest API for this project.

**The technologies I used** - Python, Django, Postgres, Docker, Digital Ocean

### **Back-end Developer/ AloVekil**

I created Rest API for this project.

**The technologies I used** - HTML, CSS, JavaScript, Python, Django, Postgres, Docker, Digital Ocean
